PROFESSIONAL SUMMARY

Software Quality Engineer with 4+ years of progressive experience in banking, insurance, and fintech: from QA internships to leading the test strategy for a cross-functional team of ~5 QAs at Banco Pichincha S.A. I define and automate tests at the acceptance, integration, and end-to-end levels using SerenityBDD, Cucumber, and Karate Framework (BDD/Gherkin), applying the Screenplay pattern and SOLID principles, and integrate those validations into CI/CD pipelines (Azure DevOps, Git). In my current role I reduced regression cycles and test execution times, introduced Contract Testing as a quality practice within CI/CD, and mentored the team, strengthening its technical and functional autonomy by 30%. I'm looking to take on that same level of ownership, contributing to the team's standards, metrics, and ways of working.

TECHNICAL SKILLS

Programming languages: Java, Python, JavaScript, HTML, CSS, SQL

Test automation (Acceptance · Integration · E2E): Selenium, SerenityBDD, Cucumber, Karate Framework, Gherkin, BDD, Behave, TestNG, Pytest, Requests

Design patterns & principles: Screenplay Pattern, Page Object Model (POM), SOLID Principles

Performance & quality testing: K6, JMeter, Dynatrace

Continuous Integration/Continuous Delivery (CI/CD): Azure DevOps, Git, Maven, Gradle, SonarCloud, Docker

Databases: SQL, PostgreSQL

Test management & tools: Jira, X-Ray, Zephyr, Confluence, Postman, Bancslink, Salesforce

Agile methodologies: Scrum, Kanban, ATDD, TDD, TDM

AI tools applied to development: ChatGPT, GitHub Copilot, Claude, Stratio

SOFT SKILLS

Quality-driven mindset, critical thinking, teamwork, assertive communication, decision-making, and people development (mentoring).

WORK EXPERIENCE

QA Engineer — Banco Pichincha S.A.

Jan. 2026 – Present

- **Strengthened** the team's technical/functional autonomy by 30% through mentoring on functional flows, E2E web automation, Karate DSL, and performance testing.
- **Achieved** 100% coverage on 13 certified retention test cases (out of 30 normalized), leading a cross-functional team of ~5 QAs using BDD practices (Cucumber).
- **Implemented** Contract Testing and living documentation as a quality practice within CI/CD pipelines, improving traceability of critical validations for technical and business stakeholders.
- **Reduced** regression cycles by 15% by implementing integration- and E2E-level automation (APIs and performance) across core banking products (Accounts, Investments, Migrations, Regulatory Compliance).
- **Cut** test execution times by up to 75% (E2E 60→20 min, APIs 60→15 min) and accelerated technical feedback by 50%, delivering test summary reports to the team earlier.

QA Engineer — NTT DATA, Quito, Ecuador

Sep. 2023 – Jan. 2026

- **Reduced** ambiguity in business requirements by taking part in their refinement to ensure they were testable before starting the test cycle.
- **Designed and automated** acceptance, integration, and end-to-end tests using SerenityBDD, Cucumber, Selenium, and Karate Framework, based on the project's functional documentation.
- **Expanded** automated test coverage, scoping it against performance and optimization needs and closing uncovered requirement gaps.
- **Integrated** automation flows into CI/CD pipelines (Azure DevOps, Git), enabling continuous validation and consistency across devices, operating systems, and browsers.
- **Took part** in test activity planning (scenarios, risks, resources, estimates, and dependencies), supporting go-live decisions with my recommendations.

QA Intern — Bayteq, Quito, Ecuador

Mar. 2023 – Jun. 2023

- **Improved** clarity of business requirements by supporting their analysis and refinement to ensure testability.
- **Defined** acceptance scenarios and test cases, taking part in planning risks, resources, and estimates for the testing activity.
- **Provided** direct support to the QA team in test execution and results documentation, speeding up quality-status tracking.

QA Analyst — Perseject, Quito, Ecuador

Dec. 2022 – Mar. 2023

- **Designed** automation and performance test cases for web applications, based on the project's functional documents.
- **Scoped** automated test coverage and confirmed it matched what was implemented.
- **Built** automation flows for test data generation and executed tests according to the team's daily plan.

QA Intern — Zurich Seguros Ecuador, Quito, Ecuador

Jul. 2022 – Dec. 2022

- **Built** automation and performance test cases for insurance applications, based on the project's functional documents.

- **Set** the scope of automated testing and validated that coverage matched business requirements.
- **Verified** functional consistency across devices, operating systems, and browsers, communicating results clearly and in a structured way to the team.

EDUCATION

Open House English
English | Sep. 2025 – Present

Kruger Instituto Xponencial, Quito, Ecuador
Full Stack Bootcamp | Jul. 2024 – Nov. 2024

Universidad Tecnológica Israel, Quito, Ecuador
B.S. in Information Systems Engineering | Oct. 2021 – Sep. 2024

CERTIFICATIONS & ADDITIONAL TRAINING

QA & Test Automation

- ISTQB® Certified Tester – Test Automation Engineer (CT-TAE) — *ISTQB®* (in progress)
- ISTQB® Foundation Level 4.0 — *ISTQB®* (June 2024)
- ISTQB® Certified Tester, Foundation Level – Agile Tester — *ISTQB®* (April 2025)
- Automatización de Pruebas REST API con Rest Assured, Postman, Serenity, Karate, Java, Cucumber — *JB Enterprise Group* (March 2024)
- Karate DSL: API Automation and Performance from Zero to Hero — *Udemy* (March 2025)
- Curso de QA Automation con Serenity: de novato a experto — *Udemy* (April 2025)
- K6: Pruebas de rendimiento y carga para principiantes — *Udemy* (March 2025)

CI/CD & DevOps

- DevOps Foundations: Continuous Integration and Continuous Delivery — *Pluralsight* (April 2025)
- Git Fundamentals — *Pluralsight* (April 2025)
- Developing Docker Apps: Core Principles — *Pluralsight* (April 2025)
- DevOps y Cloud con Azure DevOps, App Service, Pipelines y Git — *Udemy* (March 2025)

Observability & Reliability

- Dynatrace Fundamentals — *Pluralsight* (April 2025)
- Site Reliability Engineering (SRE): The Big Picture — *Pluralsight* (March 2025)

Agility & AI Innovation

- CSM – Scrum Master — *Scrum Alliance, Inc.* (November 2024)
- Generative AI: Data Governance, Data Fabric Basics y Data Processing — *StratioBD* (July 2025)
- GitHub Copilot: Fundamentos y Aceleración del Desarrollo — *Microsoft / Hackathon Banco Pichincha* (February–July 2025)
