Portfolio: <https://bryanalexfreire.github.io/>

Professional Profile

Software Quality Engineer specialized in QA Automation, API Testing, and Performance Testing in banking and fintech. Design Risk-Based Testing strategies integrated with CI/CD to accelerate delivery with quality. Achieved 35% reduction in post-release defects and optimized API validation cycles from 60 to 15 minutes. Focused on technical leadership, cross-functional collaboration, and measurable business results.

Key Competencies

- QA Automation (Karate, SerenityBDD, Cucumber, Selenium)
- API Testing (REST, Postman, SQL Validation, Contract Testing)
- Performance Testing (K6, JMeter)
- CI/CD Quality Validation (Azure DevOps, Git)
- Risk-Based Testing | Test Strategy Design | Technical Leadership

PROFESSIONAL EXPERIENCE

QA Engineer — Banco Pichincha S.A.

Jan. 2026 – Present | Quito, Ecuador

- Led QA for banking products (Accounts, Investments, Core Migrations, Regulatory Compliance) reducing regression cycles 75% with E2E/APIs/Mobile/Performance implementation
- Optimized execution: E2E 60→20 min, APIs 60→15 min, Mobile 30→15 min; accelerating technical feedback 50% with real-time validation dashboards
- Integrated quality controls in CI/CD Azure DevOps/Git pipelines, decreasing post-release defects 35% through Risk-Based Testing strategy
- Managed cross-functional team ~5 QAs. Normalized 30 retention cases → 13 certified (100% coverage, BDD with Cucumber)
- Implemented Contract Testing and CI/CD integration. Living documentation and operational dashboards for critical validations
- Mentored team in BDD automation, Karate DSL, performance testing; strengthening technical autonomy 30%

QA Engineer — NTT DATA

Aug. 2025 – Jan. 2026 | Quito, Ecuador

- Designed functional, automated, and performance testing strategies with SerenityBDD/Karate/K6, increasing coverage 28%
- Automated critical business scenarios in APIs and E2E flows, reducing regression time per release 35%
- Standardized planning, estimation, and risk management in Scrum/Kanban, improving delivery predictability 20%
- Coordinated validations with development and operations via Jira/X-Ray, decreasing integration incidents 25%

QA Intern — Bayteq

Mar. 2023 – Jun. 2023 | Quito, Ecuador

- Supported requirements analysis and test planning with Jira, improving acceptance criteria clarity 25%
- Executed functional tests on prioritized modules, improving first-cycle resolution 20%
- Collaborated in QA and development readiness sessions, reducing pre-testing rework 15%
- Consolidated progress and defect reports, improving quality status visibility 30%

QA Analyst — Perseject

Dec. 2022 – Mar. 2023 | Quito, Ecuador

- Designed and executed automated and performance tests for web apps with Selenium and K6, reducing production incidents 22%
- Validated cross-browser and cross-device compatibility, increasing functional stability 30%
- Documented results with severity and priority indicators, accelerating release decisions 20%
- Proposed preventive quality improvements, decreasing repetitive defects 18%

QA Intern — Zurich Insurance

Jun. 2022 – Dec. 2022 | Quito, Ecuador

- Designed and executed automated and performance tests for insurance applications, improving scenario coverage 25%
- Prepared and optimized test data for complex cases, reducing execution inconsistencies 20%
- Validated functional and non-functional requirements with traceability matrices, improving coverage visibility 30%
- Collaborated with international teams in quality reviews, decreasing validation rework 15%

IT Intern — Banco Guayaquil

Jan. 2022 – Jun. 2022 | Quito, Ecuador

- Provided operational technical support for banking system users, improving incident response times 20%
- Executed preventive and corrective equipment maintenance, reducing operational interruptions 18%
- Managed tickets with impact-based prioritization, increasing SLA compliance 15%
- Prepared operational control reports, optimizing area decision-making 20%

TECHNICAL SKILLS

Test Automation and Frameworks: Selenium, SerenityBDD, Karate DSL, Cucumber, TestNG, Pytest, Screenplay, BDD

Languages and Development: Java, JavaScript, Python, SQL

Performance Testing: K6, JMeter

APIs and Backend: REST APIs, Postman, API Validation, Contract Testing

Databases: PostgreSQL, Redis

DevOps and CI/CD: Azure DevOps, Git, Maven, Gradle, SonarCloud

Quality Management: Jira, X-Ray, Zephyr, Confluence

Methodologies: Scrum, Kanban, TDD, ATDD, DDT, KDT, Risk-Based Testing, Shift Left Testing, Shift Right Testing

SOFT SKILLS

- Technical Leadership
- Stakeholder Management
- Risk-Based Decision Making

CERTIFICATIONS AND TRAINING

- ISTQB® Agile Tester
- ISTQB® Foundation Level 4.0
- Karate DSL: API Automation and Performance
- K6 Performance Testing
- DevOps Foundations: CI/CD
- Site Reliability Engineering Fundamentals
- Stratio Generative AI: Data Governance
- Stratio Generative AI: Data Fabric Basics
- Stratio Generative AI: Data Processing
- GitHub Copilot Fundamentals
- Certified ScrumMaster (CSM®)

EDUCATION

Universidad Tecnológica Israel, Quito, Ecuador

Engineering in Information Systems

Oct. 2021 – Sep. 2024

Kruger Instituto Xponencial, Quito, Ecuador

Full Stack Bootcamp

Jul. 2024 – Nov. 2024

LANGUAGES

Spanish (native) | English (B1 – professional proficiency)
